MUSHARRAF INTERNATIONAL COMPANY

CORPORATE PROFILE

INDUSTRIAL SOLUTIONS & ENGINEERING EXCELLENCE

Specialized engineering, fabrication, installation, dismantling, and maintenance of industrial structures, concrete batching plants, and heavy steel frameworks across the Kingdom of Saudi Arabia.

Musharraf International

Advanced Technical & Smart Resources

Kingdom of Saudi Arabia (KSA)

ABOUT US

Welcome to Musharraf International, where we build your visions. We are a well-established company working throughout the Kingdom of Saudi Arabia (KSA), equipped with advanced technical and smart resources. Our facilities are managed by a highly professional team of engineers and technicians ensuring optimal performance, reliability, and precision execution.

> **Industrial Specialization:** Musharraf International is specialized in all heavy mechanical work, concrete batching plant erection, steel structures, shedding work, and delivering complete end-to-end industrial mechanical solutions across the Kingdom.

With years of hands-on experience, we deliver safe, precise, and efficient solutions focused on the installation, dismantling, and maintenance of industrial plants, concrete batching setups, ice plants, hanger systems, and all types of shed structures. We proudly serve contractors, manufacturers, and project owners nationwide. Our market reputation is built firmly on reliability, deep technical expertise, and an unwavering commitment to getting complex engineering jobs completed safely and on schedule.

OUR VISION

To deliver safe, efficient, and high-quality installation, dismantling, and maintenance solutions for industrial infrastructure. We achieve this through skilled teams, rigorous engineering standards, a total commitment to client success, on-time delivery, and playing a leading role in market changes through continuous technical innovation.

OUR MISSION

To enhance stakeholder value through the implementation of innovative approaches. We deliver high-quality industrial plant and steel structure solutions within strict timelines that meet international standards, maximize client value, and minimize operational downtime through an innovative, accountable, and highly motivated workforce.

OUR SERVICES & SCOPE OF WORK

Regardless of your complex industrial circumstances, we provide a clear analysis of cost and time savings before you commit, ensuring that difficult technical problems turn into seamless execution.

Concrete Batching Plant Solutions

Full mechanical, electrical, and plumbing (MEP) installation, complex relocation, alignment, and full

Ice Plant Installation & Maintenance

Complete engineering setup, precision laser alignment, and comprehensive ongoing

commissioning of both stationary and mobile concrete batching plants.

maintenance of heavy industrial ice plants for mega construction sites and large-scale cold storage applications.

Hanger System Installation

End-to-end engineering design, shop fabrication, and high-altitude erection of robust structural steel hanger systems specialized for logistics warehouses, factories, and massive parking hangars.

Shed Structures & Steel Fabrication

Precision manufacturing, on-site erection, and structural maintenance of all types of pre-engineered buildings (PEB), custom industrial sheds, and complex steel frameworks.

Technical Capabilities & Expertise

We continuously expand our capabilities and engineering knowledge, enabling us to achieve the highest standards of excellence across the region:

- Complete turnkey mechanical erection and dismantling of industrial concrete batching plants.
- Precision alignment, industrial heavy-duty welding of steel structures, and integrated material conveyor systems.
- Comprehensive mechanical, electrical, and hydraulic system integration.
- On-site management spearheaded by certified engineers and professional technical supervisors.
- Full compliance with strict Kingdom of Saudi Arabia (KSA) safety regulations and international quality standards.

WHY CHOOSE MUSHARRAF INTERNATIONAL

TECHNICAL SPECIALISTS

Engineers & technicians fully trained and certified on leading global industrial equipment brands.

FAST TURNAROUND

Minimizing production downtime with optimized planning and a skilled, responsive manpower force.

SAFETY FIRST

All execution strictly adheres to localized HSE protocols and stringent ISO 45001 international standards.

END-TO-END SUPPORT

PROVEN TRACK RECORD

A single accountable partner from initial site survey to heavy lifting, plant commissioning, and lifecycle maintenance support.

Trusted daily by first-tier prime contractors on high-profile, nation-building infrastructure mega-projects across KSA.

Our Core Corporate Values

Quality: Every single bolt, weld, and structural connection precisely meets rigorous engineering specifications.

Integrity: Transparent corporate pricing structures and completely honest, data-driven project timelines.

Accountability: We confidently own the project lifecycle entirely from initial groundbreaking to final handover.

Innovation: Implementing smarter, tech-driven execution methods explicitly to save client time and reduce costs.

Teamwork: Highly coordinated crews and specialized multi-disciplinary engineering blocks that operate as one cohesive unit.

OUR TEAM & WORK PROCESS

Our core team consists of cross-functional mechanical, electrical, and civil engineers, certified riggers, qualified code-welders, and expert technicians with profound field experience on major industrial projects in KSA. All supervisors are robustly trained in advanced safety management and equipment-specific procedures, allowing us to maintain an unblemished reputation for outstanding project management and clear communication.

Our Standardized Work Process

1. **Site Assessment**
   We conduct thorough physical site inspections and rigorously review technical, structural, and schematic drawings.
2. **Strategic Planning**
   Development of detailed method statements, risk assessments, critical-path timelines, and precise resource planning.
3. **Precision Execution**
   Safe installation, lifting, or dismantling carried out by certified crews under strict engineering supervision.
4. **Testing & Commissioning**
   Full multi-system verification checks, safety audits, performance benchmarking, and formal client handover.
5. **After-Production Support**
   Preventative ongoing maintenance, responsive technical troubleshooting, and critical spare parts management.

PROJECT PORTFOLIO & KEY ACHIEVEMENTS

25+

CONCRETE BATCHING PLANTS INSTALLED & COMMISSIONED

9

MEGA PLANTS COMPLETED IN NEOM (THE LINE)

Musharraf International has built a pioneering reputation in the region through high-quality project execution. Our project delivery footprint includes:

- **Infrastructure & Residential:** Installation and dismantling of massive concrete batching plants for housing and national infrastructure frameworks.
- **Industrial Fast-Track:** Industrial ice plants engineered for extreme-condition construction sites, crushing plants, and ready-mix setups.
- **Logistics & Manufacturing:** High-capacity steel hangers, pre-engineered sheds, and manufacturing industrial-sector framework projects across KSA.

Prestigious Clients & Project Footprint

Our client list includes industry-leading partners and premier organizations involved in the Kingdom's most high-profile Vision 2030 landmark projects:

NEOM (The Line Project) | NEOM Trojena | NEOM Shushah Island | NEOM Sharma | NEOM Tunnel Project (under FCC) | National Housing Company (NHC) | King Salman Park | Asas Almohileb (Rummah Batching Plants & Block Factory) | MHC (Rummah, Riyadh)

> *"Recognized across the Kingdom for on-time project delivery, superior structural quality, and maintaining an exemplary record of **zero major safety incidents**."*
